

# IntuitivePlan (v.1.0)

## Fast, Reliable & Versatile Inverse Planning Solution

### KEY FEATURES:

- Ultra-fast computation
- Short planning time
- High quality dosimetric profiles
- Interactivity – “easy and direct manipulation of isosurfaces”
- Multiple metastases: simultaneous computation of all targets
- Compatible with Leksell Gamma Knife® Perfexion™ & Icon™

**Primal-Dual convex optimization for radiosurgery and radiotherapy is the foundation of Intuitive Therapeutics' IP and technology**

### SPEED

- < 1 min for small TV
- 2 to 5 min for large TV

### ACCURACY

- Intuitive inverse planning
- High performance dosimetry indexes, matching plans performed by expert users
- Short beam-on time

### INTERACTIVITY – MANIPULATION OF ISO-SURFACES

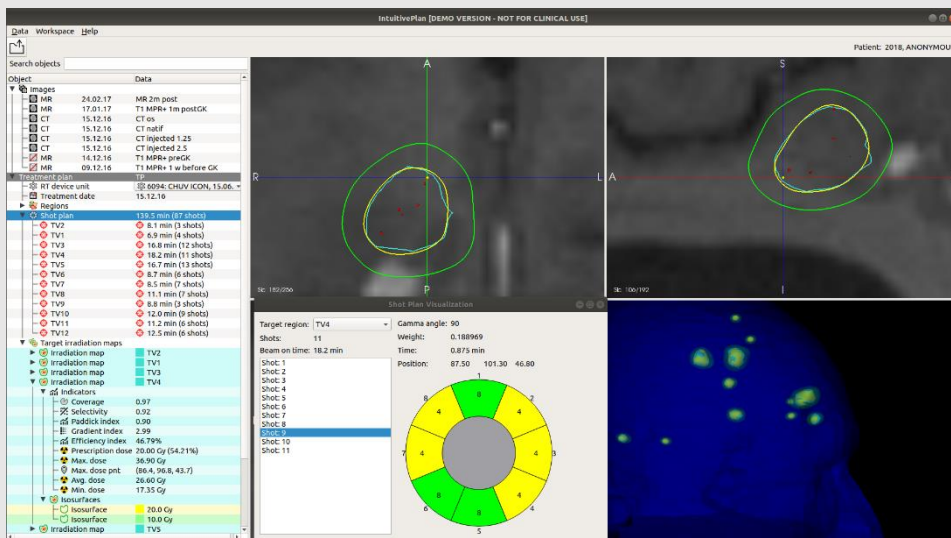

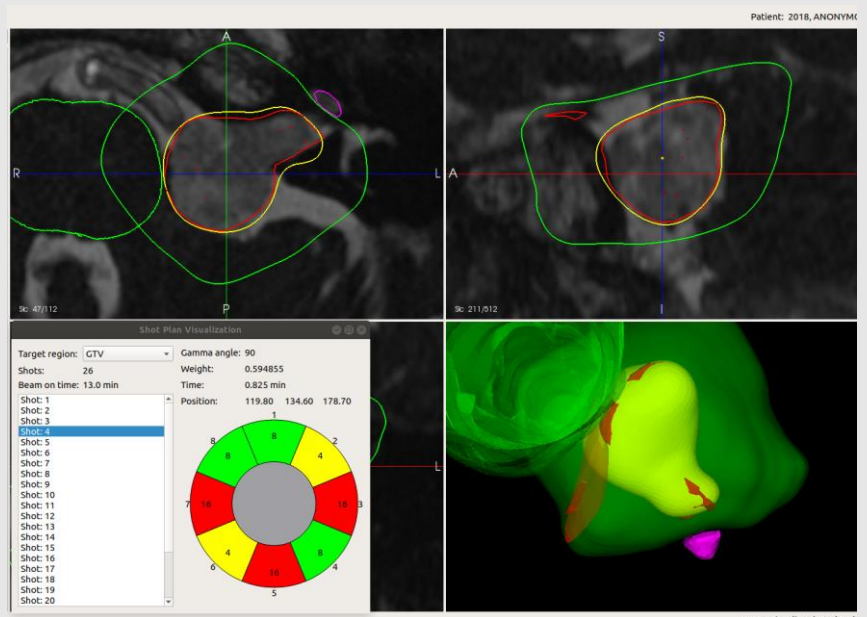

- No need to draw OAR(s)
- Beam-on time reduction with constraint relaxation
- Constraint max dose point position
- Adaptation to the users' needs

# IntuitivePlan (v.1.0)

## ADDITIONAL FEATURES

- Finds the optimum prescription isodose
- Optimal use of composite shots
- Plan comparison tools: quick access to different treatment options
- Multiple hardware platform: from laptop to workstation

Potential impact on clinical practice and workflow:

- Shorter planning times
- Shorter treatment times
- High quality dosimetry indexes
- More homogeneous plans

## THE COMPANY

- Incorporated in 2010 – over 8 years of expert R&D
- Patented solutions
- Expert management & proficient medical software developers
- Based at the heart of the Swiss Health Valley
- Partnerships and collaborations with leading institutions: EPFL, CHUV, HEIA-FR & CSEM-NE
- Scientific partnership with reference centers for pre-clinical evaluation and validation
